Strive for progress

Life cannot survive without progress. Change brings fulfillment, happiness, and strength.

1

Think critically

A tiny idea is capable of solving a monumental problem. Think outside of the box, but don't lie to yourself.

2

Play the long game

Opportunities arise, then disappear. Be prepared for the chance, slow to commit, but stand strong in your decision.

3

Agreements over assumptions

We all get frustrated when things don't go the way we expect. Pre-emptively transform expectations into explicit agreements to save a world of pain.

4

Distribute responsibilities

Obedience isn't a virtue because power always corrupts. We can help save each other by decentralizing responsibilities.
